The Heartlessness of the Prince of Wales.

From the Philad uphia Bulletin present Prince of Wales is but following distens of his illustrious predecessors, and but truthful asservation that "blood will telt." The Guelph family in we been consistently brutal in their treatment of their own families ever since the first deorge left his loved Duchy to assume the crown of Britain. That worthy German gentleman began his donestic tyranny by imprisoning his wito Sophia, upon a trumped up charge of indichity, after completely ateniating whatever affection she might have had for him, by his brutalty and open unfulfulfuless. Once rid of her, he filled her place with the hidcons and doesned Duchy on Konda with when he

and degraded Duchess of Kendal, with whem he lived, unmarried, for years. George the Becond, hated by his father, poseused the same brutal institucts, and atthough he did not treat. Caroline, who was his intellectual auperior, as his finther had done his wife, he was guilly of the grossed infidelity, and often cold-blooded brutality, even when his wife lay gasping for breath upon her death bed.

she was so overcome by staine and cagnituda. Such were the predecessors of the young man who is now amusing linaself in London while his wife is dying. And while every honest man must despise him as a heartless wretch, something must be parlosed to his hereditary taint of brutality and insunity. It is very certain, however, that his conduct upon the present occasion will serve to render him even more unaversal with the English people thou he has popular with the English people than he has been, and in the advanced state of liberal senti-

A host leaves the end of Seventh street twice a week for Mt. Vernon, the former home of Washington. The fare down and back is \$1.50-dffty cents of which is paid to some one in custody of the estate to keep everything in good trim, and make such repairs as may be roadcred necessary from time to time. The boat stops three or four hours after reaching the place, allowing visitors ample opportunity to visit the tomb, ramble round the grounds, and inspect rooms or other objects of interest in the old family mansion. The trip down consumes one hour and sometimes the boat reaches the wherf with great difficults, owing to the grounds sea may be a mily mansion. The trip down consumes one hour and sometimes the hour reaches the wharf with great difficulty, owing to the muddy condition of the river and the insufficient depth of the water. Although the general appearance of the estate is that of dilapidation and neglect, it is manifest that considerable is being done to keep it at least in presentable order. A new roadway from the hoat to the house has been cut and graded; the tomb is kept in good repair; the house, surrounding dwellings, drive-ways and paths looked after; and it a vertywhere apparent that the ladies of the country have really rescued the place from desolation and decay. Only a portion of the dwelling is now inhabited, and the remander, including the distington, hall, two parlors, and the clainter room, hall, two parlors, and the chamber re Washington died, is thrown open to stran-

A Duel and its Consequences. From a Havana Letter.

A Duct and its Consequences.

From a Havana Lotter.

An amusing duet took place recently about five interference of the city. It originated in a remark made by a man to his friend on seeing a lady conting out of church. The lady was inknown to the person making the remark, but happened to be the other's wile. A slap in the face was the consequence, and a challenge came soon after. This was accepted, and the seconds selected a place. The wife got wind of the fact, and immediately took steps to prevent the dreidful estastrophe. Her first thought was to notify the police, but that might have given her husband the reputation of a coward, and shu took a botter method by going to the house of the other party, where she met his wife, and a plan was soon conocced between the feminine. In the morning both husbands got up early, wives ditto. Husbands took curfages, and their wives—one armed with fire children and the other with three-took other verlages and their wives—one armed with fire children and the other with three-took other verlages, and their wives—one armed with the children and the other with three-took other verlages, and their wires—one armed with the children and the other with three-took other verlages, and their wires—one armed with the children and the other with the concentrates drive up with their passengers, who cooly informed the men that they also had come to fight, as as to make a complete family quarrel, each at the same time producing an empty pure and a package of boby lines as their arms and manitions of war. The little ones had poppins and ficercrackers, and soon some induged in a cry. It is uscless to add that the bloodthy that y beneficks made pace on the spet, and returned to Havan in company with their seconds, to celebrate the altir over a chumpy fieldiance.

Bridget's Account of her Interview with

TITUSVILLE, PA., TUESDAY, APRIL 30,

Bridget's Account of her Interview with the Deutist.

From the London Morning Post.

"Well, Bridget," and Margory, "how did you get along with the Goether—what did yo say till hem, and what he do till you?"

Bridget—It's nothing he did till me, nor I till him, that's all—only, says I—"Och, doether, doether, doether, dear, it's me tooth that aches intrely, sure it is; and I've rain' to have it drawn ont, an' it plaze you." "Do it pane ye?" says he till me. "Och, marther, can ye ax me that, now, and me all the way down here to see you about it?" says I. "Sure, I havn't slept day or night these three days. Havn't I tried all manes to quiet the jumpling devil" Didn't they tell me to jun raw brandy in my mouth, but would it say there? Jist till me, now. No, the deril a bit could I keep it up in my mouth, though it's far from the likes of me to be drinking the brandy without extreme provocation, or by accident. So thin the decident of the says, doether," says I, "there's time enough; you'll not be in such a harry when your turn comes, I'm thinking." "O, well," says the doether, "and yer no ready, now, you may come the morrow."

"Indade, doethur, I'll no stir from this sate with this old tooth alive in me jaw," eays I, "so with this old tooth alive in me jaw," eays I, "so with this old tooth alive in me jaw," eays I, "so

indr., "and yet nearly, now," you may come the morrow."

"Indade, docthur, I'll no stir from this sate wid this old tooth alive in me jaw," says 1, "so you may just prepare, but ye nade not come slashing at a poor Christian body, as if ye would wing her neck off first, and draw her tooth a yer convanience afterwards. Now clap on yer piachers, but mind ye get hould of the right one, ye may eazily see it by its acking and jumping."
"O," says ke, "I'll get the right one," and with that he jubs a small razor-looking weapon intil that he jubs a small razor-looking weapon in the that he just a small razor-looking weapon inti-me mouth, and cuts up me gooms as it is were nought but could mate for hash for breakfast. I felt my head fly off my shoulders, and looking up, suw something monosthrous bloody in the docthur's wrenching iron. "Is that mu head you've got there," says I. "No, its only yer tooth." he made answer. "Maybe it is?" said I as my eyes began to open, and, by putting my nand up, I found the outside of my face on, though I felt as if all the inselt had been hand out.

"I had taken a dollar and a linft to pay for the operation, thinking it would be enough for a

One, seven years old, for stelling ples, was at the island two years. Two others, nine years old, coal pickers, have each been to the island, and both smoke and chew. Pretty "inst" for almo years! Two, aged elevan and thirteen, sing and dance in linger beer sations. If the three hundred boys who have attended this school little past term, twenty per cent. have already been arreated once or more, eighteen per cent, are without homes and "bonk out" on wharves, lumber yards and in every available nook and corner; forty per cent, laved lost one phrent, twenty per cent, are without elther, thirty per cent, are twenty-five per cent bonthacks, twenty per cent, coal and rag-pickors, ten per cent, are in bowling alleys and liquor salouns, twenty sing content and offices and markets. Nearly very one of them use tobacco, smoke, chew, and the report adds, somewhat inconsequentially, attend confessional.

A Texas paper tells of a young couple who input on herseback, accompanied by a clergy in who was to marry them. The indy's father are chase, and was orticaking the party when no maiden called out to her elerical filend the matter called out to feer electrical fillend, "Can'tyon marry us on the ran?" The idea took, and he convinenced the ritual, and just as the bride's father clatched her bridle rein the chagman pronounced the lovers man and wife. The father was so pleased with the dashing action that, as the story goes, he gave them both his blessing.

The Vicksburg He ald says: "There is in the flurnry of the Young Men's Association a book of over one thousand pages, which shows the operation of moths to a greater extent than we have ever heard of before. The book is one of the Government call-band when we will be the contract of th bave ever heard of before. The book is one of the Government calf-bound volumes, printed in 1886, and on the outside are nine small holes through which they make their exit. The la-terior of the book is almost entirely cut or caten up, the fittle insects baving passed all the way through, evidently at their leasure.

THE EUROPEAN PEACE CONGRESS.

New York, April 20.

The Times' special says: The workings of the Treasury for the month just clossag, will show another large reduction of the national debt. In the next sancement Secretary McCulloch hopes to reduce the total debt to about twenty-five hundred nullians, at which point he believes it must remain stationary so long as the present nate of Government income and expenses are maintained. The Indian work will draw largely on the National resources this summer, and while the course of the Treasury is perfectly clear and easy, the National debt must soon be suspended, for a time at least.

There has been a very strong impression prevailing in this city for the past few days that Gen. Rosseau, who is here awaiting orders, would be sent to New Orleans to superseed Gen. Sheridan. The report has been telegraphed South, but I am able to state on the best authority, that we officer in the South holds his command by so ceruin a tenure as Gen. Sheridan. Gen. Rosseau does not desire a command in the South but hopes to be assigned to the Department of the Columbia, which will give him a very desirable position on the Pacific coast.

The following is Gen. Sheridan's order relieving one of the nids of the New Orleans Chief of Police for improper interference with registration:

"John Boyd, aid to the Unley of Police, hav-

The Herald's spichal says: The parties inging an injunction against the Reconstruction Line express confidence in their success.

The Times' special says: A circular signed by flity of the leading manufacturers of New York, Philadelphia, Plutsburgh and Boston, among whem are Peter Cooper, John Jewett & Sons, and others, of New York, Win, Sellers & Co., Ben. Bullock & Sons, and others of Philadelphia, Chiningham & Innsen, and others of Philadelphia, E. B. Walil, of Detroit, with others, has been issued, calling a conference or the nanufacturing interests of the country to incert at the Astor House, New York, on the 8th of May, next, to deliberate upon the present condition and posspects of the material interests of American industry, and to decide upon some method of atonsing public attention to this subject.

The success which has attended the efforts of the Free Trade League in affecting public sentiment by the wide spread distribution of popular documents through the country, is cived by the call as demonstrating the necessaty of adopting some means equally efficient to enumera, the eyll it is alleged to be worklag. bervation and upon information obtained from various orsons owing interests in the wells mentioned below pard. The Tarr Homestead Company have had Toredoes exploded in the Devine and Kingsbury wells if these two wells one had been flowing and the other mannage nearly 129 barrels, taken tegether, but they ad decreased until both were yielding but about 8 bar-lap per day. After the explosion of the Torpedo, both pure man the first weather than the formation of the Torpedo, but have the first weather than the formation of the Torpedo, but have the first weather than the formation of the Torpedo, but have the first weather than the formation of the Torpedo, but the first weather than the formation of the Torpedo, but the first weather than the formation of the Torpedo, but the first weather than the formation of the Torpedo, but the first weather than the first wea

Third. The Burnett well. Had pumped as high as 80 series, and had decrossed to 10 barrels. The Torpeds increased it to flowing 60 harrels. The Torpeds increased it to flowing 60 harrels. The Torpeds was paint in, and is now pumping 60 barrels, with every indication that it will soon flow, as it is increasing both in gas and oil.

Three other wells in the same noighborhood have him bought up from pumping, in the aggregate about 16 harrels, to prompture they are to be precisely of the interesting of the office of them is now flowing and the other won me pumping. They will, to all opposamoes, reach smuch higher point.

We believe there has not been a single exception on this farm where your Torpedo has not greatly bonefited the will operated upon. All have been marked successes. Mr. Burnett slates that in his well the entire appearance are reped in two days, and he heliares all that hat of their them have equally incomble opinions. The increase, as nearly as we can learn in the eight wells mentioned above, taken together, is fully 100 par found in the time the Torperb, and 1000 per cent, over the highest point these value or exploded in them, hung to hat rols total befour the explosion and 400 fer soul results cannot fail to be artifactory in the highest lower in the registerior in the highest bush or explication and 400 fer.

Tourspoke you Oit, Wells-Mose Bekerford, Results-Globnel Roberts is constantly receiving on grantiations upon the success of his invention for researching abundanced wells and facreasing the production of uthers. The Torpedo is evidently destined to slice it somithety revolution in oil mining, and its benefit of the constant of the production of the constant of th

office a nomitiele revolution in oil mining, and its bene-ncial results am scatcely be overrated. The following certificates are it ome two well-known producers at Fe-trations Contro. Their testimany as to the success of the application is perfectly conclusive:
This is to certify that we have had Torpedors explo-ded in our wells to this date with the following results in Anderson well No. I, increased production severity (70) barrois; Hawkins well, increased production severity (70) barrois; and not lessed 21, increased production to the control of the control of the control of the little control of the control of the control of the Million of the control of the control of the all interested in oil, as we have not must with a single failure, and believe the Torpedo to be of greater practice all value than any invention introduced in the produc-tion of oil.

the production of a daily yield of from staty to cipring barries of oil. In view of these facts, we considerily recommend a trial of the Roberts' Torpedo to all well-owners whose well are other dry bulls or have sensed to produce. We consider the invention to be one of great practical value, as elidenced by the convision of this well from one of no value whatever to one worth many thousand dullars.
